THE INDICATED ALLOWABILITY OF CLAIMS 22-26 IS HEREBY
WITHDRAWN IN VIEW OF THE NEWLY DISCOVERED ART OF HALES; HENCE
THE FINAL REJECTION OF 2/28/07 IS HEREBY WITHDRAWN/VACATED.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that
form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by
Hales (503536)

Hales discloses a spreader which is capable of being used as a frame spreader .
The same posses the ability to move between extended and retracted positions; see
figures 2 and 3. the spreader includes at least one preset spreader length as shown in
figure 1 the spreader of hales comprises:

1. at least one elongated body D/A.
2. first extension and second extension hingeably attached to the elongated
body and configured to move between folded and unfolded positions
where in the folded position the extensions overlap the body members and
the folded extensions do not contribute to the spreader length: see figure
2; and in the unfolded position the extensions extend from the at least one
elongated body members and the unfolded extensions contribute to the
spreader length; see figure 2

Art Unit: 3635

3. in the extended position the two ends a/a2 of the spreader is capable of contacting frame components at the preset distance and in the retracted position the two ends are spaced from the frame components
4. the ends of the body members and the ends a3 of the extension are capable of conforming , at least in part to the profile of the door extensions

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hales in view of St Martin et al (6371422).

Hales lacks the standoffs to elevated the spreader above floor lever as shown by St martin et al. St Martin et al discloses a spreader with standoffs 22 to elevate and positions the spreader in the frame. It would have been obvious to one of ordinary skill in the art to employ the standoff of St Martin to protect the framing while positioning the spreader within the frame.
